

3 Day Evidence-Based Upper Limb Retraining after Stroke Course 2022

Advance Rehab Centre is delighted to be hosting this 3 day comprehensive course focusing on helping therapists to minimise upper limb impairments post-stroke, and increase the patient's engagement in activities.

WHO IS THE COURSE FOR?

This course will benefit occupational therapists and physiotherapists from hospitals and community-based settings, who work with adults following stroke and acquired brain injury, as well as clinical educators. This course has specific learning outcomes to assist you in developing your skills and knowledge in upper limb rehabilitation.
